PROBLEM

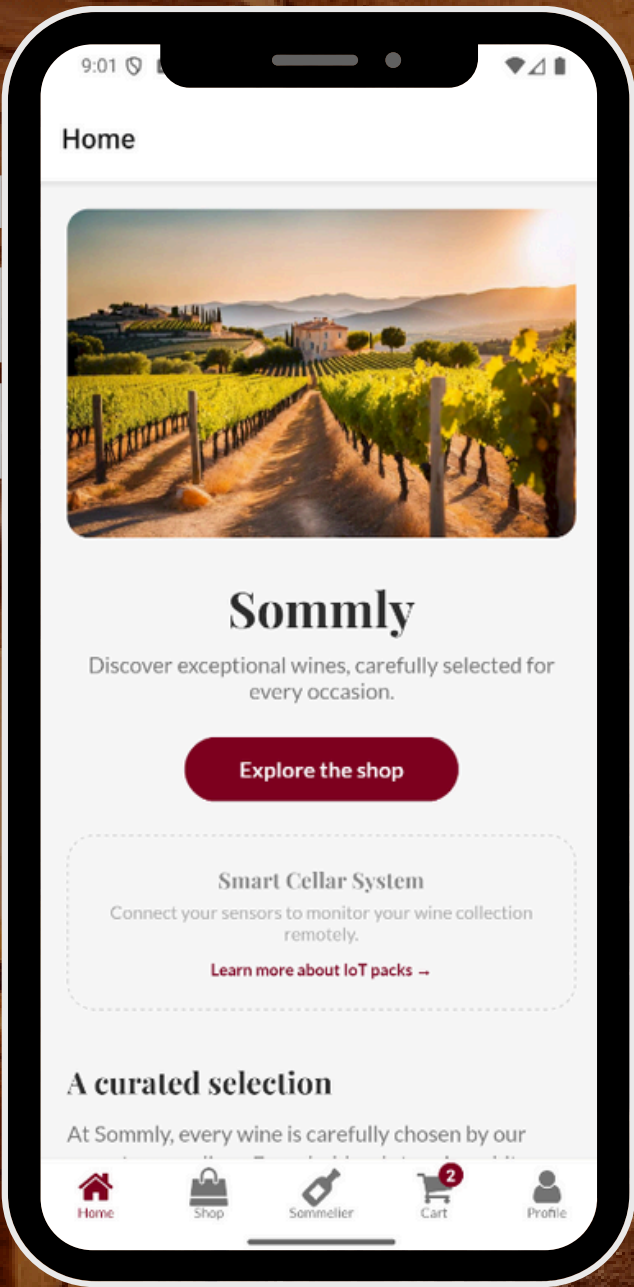

THE WINE SELECTION CHALLENGE

Consumers are overwhelmed by choice in stores.

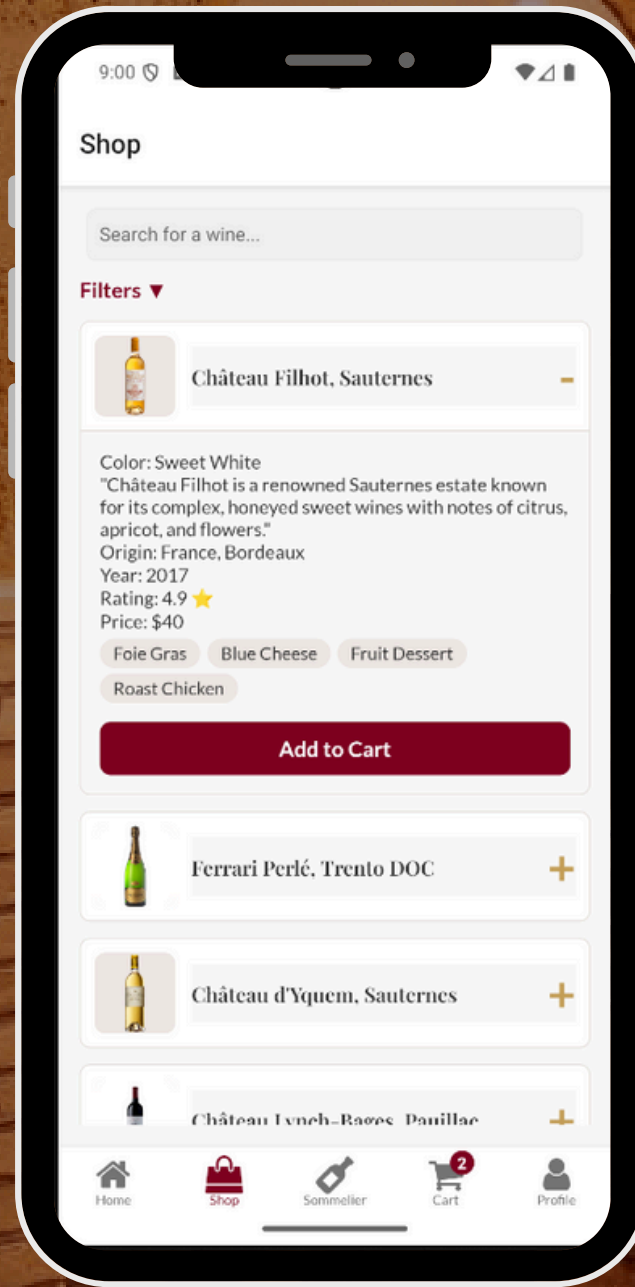

Novices struggle to pair wine with food or personal tastes.

Enthusiasts lack a simple, discovery-focused tool for niche wines.

PROFILE

APPLICATION LOGIC & USER FLOW

PERSONALIZED WINE EXPERIENCE

- Filtering-based wine selection
- Wine type & food pairing filters

DIRECT CONNECTION WITH PRODUCERS

- Direct connection between customers and seller
- Each wine linked to a specific producer

IoT Dimension

- Real-Time Connectivity: Integration between Firebase Cloud sensors and the mobile interface.
- Live Data Sync: Instant updates of Temperature and Humidity
- Personalized Security: Sensitive IoT data is only accessible to the authorized owner via Firebase Authentication.
- Quality Assurance: Ensuring optimal storage conditions to preserve wine integrity post-purchase.

My Connected Cellar

TEMPERATURE

20°C

HUMIDITY

70%

• Real-time monitoring enabled

USABILITY STUDY

01.

NAVIGATION WITHIN THE APP

All the test users managed to navigate and use the app naturally

02.

POTENTIAL CLIENTS

Within our answers, 25% of the testers would be frequent users

03.

STRENGTHS

The design, accessibility, catalog and ease of use

04.

IMPROVEMENTS

Searchbar, profile page, order history and payment have been improved using the feedbacks of our study.
